Midland CB Multi 4W: Innovation and Tradition for Impeccable Communications

## CB RADIO

# 28

Midland presents the CB Multi 4W, a mid-range model with a 2" colour LCD display and seven selectable colours. It includes digital squelch for clear communications, 12/24V power for both in-car and truck use, and three-level noise cancellation. The integrated VOX allows for hands-free communication, and the new microphone offers richer modulation. Midland 28 combines tradition and innovation in a single high quality solution.

### KEY POINTS

**Colour LCD display:** 2" with seven selectable colours, improves visibility and customization of the information displayed.

**Digital Squelch and Noise Cancellation:** on three levels it guarantees clear communications, reducing interference and background noise to a minimum.

**Integrated VOX and New Microphone.**

Voice activation allows hands-free communication, while the new microphone offers richer modulation, improving the quality of voice transmission.

**CB RADIO****28****Description**

Midland presents the new CB Multi 4W model, a mid-range device that integrates a series of advanced features for optimal communication. The colour LCD display is one of the most notable innovations: twice larger than the 18 model, the Midland 28 offers seven selectable colours, thus ensuring superior visibility and reading clarity, particularly useful in variable light conditions. This allows users to easily read information, regardless of ambient lighting.

Another notable feature is the built-in digital squelch, which significantly improves signal handling, ensuring communications are always clear and interference-free. This system eliminates weak signals and noise, improving the listening experience.

The CB Multi 4W is powered by 12/24V, making it extremely versatile and suitable for use in a wide range of vehicles, from small cars to large trucks. Three-level noise cancellation is another important feature that significantly reduces environmental noises, ensuring communications remain clear. This is essential to ensure clear communication.

The integrated VOX allows you to communicate hands-free, increasing safety while driving and respecting the regulations that limit the use of CB in vehicles. This feature allows users to speak without having to press any buttons, improving convenience and safety.

The new microphone, equipped with an improved microphone capsule, offers fuller and richer sound modulation. Furthermore, the microphone includes three buttons (UP/DOWN/NC) which facilitate the use and navigation of the device, making it even more practical and intuitive.

The CB Multi 4W represents a perfect combination of tradition and innovation. Midland has been able to integrate the best features of previous models with the most advanced technologies, offering a device that meets the needs of both more traditional users and those looking for the latest in terms of CB communication.

## Technical features

1. Multistandard CB transceiver
2. • Frequency: 26.565-27.99125 MHz (considering all approved European frequency bands)
3. • 12/24V power supply
4. • Output power: 4 W
5. • Noise Cancelling in Reception
6. • Microphone with UP/DOWN/NC buttons
7. • 2" multicolor LCD display (7 colours) with S/meter
8. • Backlight adjustable on 3 levels
9. • Dual squelch modes: manual and DS (5 levels)
10. • Adjustable reception attenuator (RF gain) on 7 levels
11. • Emergency channel 9/19
12. • VOX adjustable on 5 levels
13. • External loudspeaker socket

## Packaging and contents

- CB Radio
- Microphone
- Microphone holder
- "U" type fixing bar
- power cord
